Hosted free on Microsoft Teams

Course Aim: To support dental and pharmacy teams to identify how to work together to promote effective antibiotic stewardship and support patients with urgent dental conditions

Learning Outcomes

- 1) Engage as a multidisciplinary team (MDT) to optimise prescribing of antimicrobials for dental conditions
- 2) Become an antibiotic guardian
- 3) Support local MDT team links to improve patient care
- 4) Identify differences between dental pain and infection
- 5) Apply your knowledge of dental pain and antibiotics to support a multidisciplinary approach to patient care
