

Limited Spaces Available: Join Our Groundbreaking Research!

We are looking for **3 more pharmacies** to participate in an exciting 6-month RCT evaluating the effectiveness of a new automated medication dispensing device. This study is designed to improve medication adherence for patients with long-term conditions who struggle with taking their medication on time. The device also features real-time alerts to family members and/or carers when medication is missed, offering an added layer of support and safety. Your pharmacy could play a vital role in advancing pharmaceutical care.

Benefits of Participating:

- Be at the forefront of innovation: Help evaluate cutting-edge technology that could revolutionise how medications are dispensed and managed.
- Enhance patient outcomes: Contribute to a study aimed at improving adherence, especially for patients with long-term conditions.
- Alert loved ones or carers: The device sends real-time alerts to family members and/or carers if a patient misses a dose, ensuring timely interventions.
- Boost your reputation: Showcase your pharmacy's commitment to advancing healthcare and innovation.
- Receive support and training: All participating pharmacies will be provided with the necessary devices, training, and ongoing support throughout the trial.
- **Up to £120** for each patient allocated the device.

What's Involved:

- Enrol patients in the trial who have long-term conditions and struggle with medication adherence.
- Implement the automated dispensing device, which will alert family members or carers if doses are missed.
- Track and report patient outcomes using our simple, easy-to-use data collection system.

Who Can Participate:

- Independent or chain pharmacies interested in advancing pharmaceutical research and patient care.
- Pharmacies with patients who have long-term conditions and could benefit from an automated solution that also offers family or carer support.

By participating, your pharmacy will help shape the future of medication management while gaining valuable insights into this innovative technology. Don't miss this chance to be part of a game-changing RCT!
