

## **Community Pharmacies Invited to Join the ADHERE Trial**

### **ADHERE: Assessing the impact of Automated Devices for enhancing HEalth and Reducing medication Errors in older Adults with long term health conditions: A Randomised Controlled Trial**

We are seeking **four additional community pharmacies** to participate in this important NHS supported research study.

#### **Why take part?**

-  **Up to £120 per patient recruited**
-  **Six month extended recruitment period (final extension)**
-  Full training and ongoing support from the research team
-  Opportunity to contribute to improving medication safety and adherence in older adults with long term conditions

Pharmacy involvement includes identifying eligible patients and supporting participation, with clear guidance and researcher assistance throughout. Recruitment is open until **end August 2026**, with follow up continuing until February 2027.

This is a valuable opportunity to contribute to evidence-based practice and support better health outcomes for older people in your community.
